

## Information Management Procedures

### 1. STRATEGIC PLAN THEME AND COMPLIANCE OBLIGATION SUPPORTED

[Information Management Policy](#)

Strategic Plan Theme: [Sustainable Future](#)

### 2. PROCEDURAL DETAILS

This document outlines the procedures for the creation and management of information that documents the University's business activities and provides evidence of University decisions, transactions and actions.

- 2.1 Information requires effective management throughout the information lifecycle to ensure that it is appropriately secured to safeguard its authenticity, integrity, reliability, useability and is used for the purposes intended throughout its lifecycle.
- 2.2 Information must be protected from loss, theft, unauthorised access or disposal, while being available to those who are authorised to access it by ensuring it is appropriately created, stored, classified, protected, disposed of or retained.
- 2.3 Information created or received during the course of Curtin business is vested in the University and remains under University control unless:
  - o There is a written agreement in place stating that the Information is owned by other parties, or;
  - o The Information constitutes Intellectual Property that is vested in an individual as per the [University's Intellectual Property Policy](#).

#### 2.4 Responsibilities

Position	Responsibilities
2.4.1 All individuals regardless of location	<p><b>Creation and storage of Information</b></p> <ol style="list-style-type: none"> <li>a) Wherever possible, identifying potential future Archives at the point of creation and contacting the University Archivist for assessment close to the point of creation.</li> <li>b) Storing Information in approved Curtin systems, unless when contractually required to use alternative storage. Refer to <a href="#">Where to Store Information</a>.</li> </ol> <p><b>Classification and metadata</b></p> <ol style="list-style-type: none"> <li>c) Classifying Information as per the <a href="#">Information Security Classification Policy</a> and labelling it with the relevant category at the point of creation then updating it at any point that the category changes. (See <a href="#">Information Security Classification Matrix</a>).</li> <li>d) Naming Information appropriately by providing basic metadata as per the <a href="#">Document Naming Guidelines</a>.</li> </ol> <p><b>Protection, access and use of information</b></p> <ol style="list-style-type: none"> <li>e) Complying with any restrictions or obligations with regards to the sharing, printing, copying and use of Information as required by:           <ul style="list-style-type: none"> <li>o the <a href="#">Information Security &amp; Information &amp; Communication (ICT) Appropriate Use Policy</a></li> <li>o the <a href="#">Information and Communication Technology Appropriate Use Procedures</a></li> <li>o the <a href="#">Disclosure of Personal Information Procedures</a></li> <li>o the <a href="#">University's Privacy Statement</a></li> <li>o the Information Security Classification category assigned to the information</li> <li>o any contractual requirements related to the Information</li> </ul> </li> </ol>

	<ul style="list-style-type: none"> <li>○ any legislative requirements to release information (including to regulators)</li> </ul> <p>f) Complying with requirements to release information under the <a href="#">Freedom of Information Act 1992 WA</a>, with the exception of global campuses who must comply with any local requirements in their country with regards to freedom of information.</p> <p>g) Consulting with the Information Disclosure Compliance Officer (IDCO) prior to commencing a project, pilot program or integration of data that involves Personal Information held by the University, to determine if a Privacy Impact Assessment (PIA) is required. Individuals undertaking research projects that may involve Personal Information are required to complete a Data Management Plan.</p> <p>h) Reporting any real or suspected loss, theft, unauthorised access or unauthorised disposal of Information to Curtin Information Management and Archives and the IT Security and Assurance Team.</p> <p>i) If the Information in h) involves Personal Information then, with the exception of Global campuses, individuals must:</p> <ul style="list-style-type: none"> <li>○ Contact the Information Disclosure Compliance Officer (IDCO) and</li> <li>○ Report the incident via the ISU Complaints Portal</li> </ul> <p>Global campuses will abide by any local requirements in their country for management and reporting of data breaches.</p> <p><b>Retention and Disposal of Information</b></p> <p>j) Deleting or destroying certain types of Information, such as low value transactional Information, as part of normal administrative practice, where formal destruction approval is not required (see <a href="#">Disposal of Information</a>).</p> <p>k) Destroying hard copy Information that has been digitised only if it meets certain conditions (see <a href="#">Scanning Documents</a>). ### 3. RESPONSIBILITIES

Responsibilities are those as set out in Section 2.

### 4. SCOPE OF PROCEDURES

This procedure applies to all staff, adjuncts, associates and students who manage University Information in any location or campus, whether in or outside of Australia.

### 5. DEFINITIONS

(Note: Commonly defined terms are located in the [Curtin Common Definitions](#). Any defined terms below are specific to this document)

#### **Business Information System Owner**

The individual authorised by the university with responsibility for the overall procurement, development, integration, modification, operation, maintenance and retirement of an information system. Examples include the business owner of Student One or Finance One.

#### **Information**

Any records, data, documents and files (including but not limited to data contained in databases or business systems, emails, social media posts, webpages, audio visual files, research data, plans, spreadsheets) in any form created, received and maintained in the course of undertaking Curtin business. Non-work related information created, received or saved by individuals into Curtin systems is also included in this definition.

#### **Metadata**

Data describing context, content and structure of records which enables the creation, use and management of these records through time within and across domains. Examples of metadata include author, date created, title etc.

#### **Personal Information**

Information (including information forming part of a database), and whether recorded in a material form or not, about an individual whose identity is apparent, or can reasonably be ascertained, from the information.

### 6. SCHEDULES
